PURPOSE

A well-developed Academic Plan lays out the changes a school needs to make to improve the level of student academic achievement, particularly for student subgroups needing the most support. The Academic Plan **prioritizes critical student learning needs**, and is meant to include innovative and/or enhanced activities that identifies what changes will be made, how the learning needs will be supported and what will be used to measure success.

Schools should align their prioritized student learning needs with the Priorities, Goals and Desired Outcomes within the Strategic Plan.

The Academic Plan template serves as the base document and is intended to be a one-year planning document. Schools have the flexibility to include additional rows and columns as needed to address the unique needs of their students and communities.

Directions for completing the School Academic Plan template can be found in the Academic Plan Template Guidance document.
