Annual Report on Enhanced Electronic Human Resources

December 2022

Act 248, Session Laws of Hawaii 2022, requires the Hawaii State Department of Education (Department) to annually report on a plan to institute an enhanced electronic human resources system. The system should include a single identifier for each position in the Department to provide real-time information for stakeholders such as the Legislature.

Enhanced Electronic Human Resources

Due to competing demands on the Hawaii State Department of Education's (Department) resources and priorities, the Department has not made substantial progress on defining requirements and system integration efforts needed to enhance our electronic human resources system.

However, during the calendar year 2023, the Department is committed to this initiative and intends to use consultant services to assess the most expeditious and efficient solution to remedy the current limitations, particularly those associated with integration of data from fiscal and personnel systems. Based on that assessment, the Department intends to determine the best path forward. The Office of Fiscal Services will collaborate with the Office of Talent Management, the Office of Information Technology Services, and the Department of Accounting and General Services - Office of Enterprise Technology Services to determine if system modernization and replacement is deemed to be necessary.
