

STATE OF HAWAII  
DEPARTMENT OF EDUCATION

P.O. BOX 2360  
HONOLULU, HAWAII 96804

OFFICE OF THE SUPERINTENDENT

December 29, 2017

The Honorable Ronald D. Kouchi, President  
and Members of the Senate  
State Capitol, Room 409  
Honolulu, Hawaii 96813

The Honorable Scott K. Saiki, Speaker  
and Members of the House of Representatives  
State Capitol, Room 431  
Honolulu, Hawaii 96813

Dear President Kouchi, Speaker Saiki, and Members of the Legislature:

For your information and consideration, I am transmitting a copy of the Annual Reports on Six-Year Program and Financial: Plan for School Repair and Maintenance, pursuant to Section 302-A-1312, Hawaii Revised Statutes (HRS). In accordance with Section 93-16, HRS, I am also informing you that the report may be viewed electronically at: <http://bit.ly/DOELegReports>.

Sincerely,

A handwritten signature in blue ink, appearing to read "CKM".

Dr. Christina M. Kishimoto  
Superintendent

CMK:jmb

c: Legislative Reference Bureau  
Office of School Facilities and Support Services

State of Hawaii  
Department of Education

# **Annual Report on Six-Year Program and Financial: Plan for School Repair and Maintenance**

December 29, 2017

Section 302A-1312, Hawaii Revised Statutes requires the Department of Education (DOE) to annually report the six-year program and financial plan for school repair and maintenance and facilities physical analysis report and facilities financial analysis report for each public school.

The report provides background, status and analysis on school repair and maintenance (R&M) projects, more commonly known as the R&M Backlog, an age profile and inventory analysis of each public school and report of the R&M projects initiated and accepted.

# **2017 Annual Report for the Repair and Maintenance of Public School Facilities in the State of Hawaii**

## **I. Introduction**

There are approximately 180,000 students enrolled in Hawaii's K-12 public school system, the 10<sup>th</sup> largest school district and only statewide public school system in the nation. That equates to one out of every eight people spend much of their weekdays in a Hawaii public school.

Keeping the condition of all the school campuses in good working order is a critical responsibility. School facilities have a direct impact on student and staff health, learning, moral, attitudes, and future. Safe and operable learning environments allow the students and staff to focus on teaching and learning without distractions, such as hearing the drip of a leaking roof, feeling comfortable one day but warm the next because of a failing air conditioning system, having to walk carefully on wrinkled carpet or loose floor tiles, or the unsightly look of faded or peeling paint.

Provided herein is a description of the building inventory, current and anticipated funding needs, progress made to date, program management, and impact of an aging building inventory on the repair and maintenance of public school facilities.

## **II. Building Inventory**

The Department of Education (DOE) capital improvements budget provides for the repair and maintenance of 261 K-12 public schools, including six public conversion charter schools. Public conversion charter schools are former DOE schools that had converted to become charter schools.

### **A. Building Inventory by School Type**

A building inventory summary by elementary, middle/intermediate, high or combination (e.g., high and intermediate) school type is shown below.

One key attribute is the percentage of buildings that are considered as "old" or "beyond expected life" age profile. An "old" profile is a building within its last one-third of its expected service life. From a design standpoint, wood constructed buildings have an expected service life of 50 years, while concrete constructed buildings have an expected service life of 75 years. Wooden or concrete buildings that fall within these respective age profiles should be planned for major structural renovation or replacement to begin a new service life.

Another key attribute is the number of portables or temporary buildings. As compared to permanent buildings, portables are less conducive learning

environments. Schools with a large percentage of area in portables should be planned for either their replacement with permanent classrooms or for their removal if necessary.

School type	Number of Schools	Number of Bldgs	SF	Ave SF per school	Average Year Weighted by SF	% In 'Old' or 'Beyond Expected Life' Age Profile	Portable SF % of Total	Number of Schools with 20%+ Portables
Elementary (K-5, K-6)	171	2283	9,040,074	52,866	1972	45%	9%	26
Middle (6-8, 7-8)	39	630	3,779,445	96,909	1974	40%	5%	1
HS (9-12)	33	1109	6,330,954	191,847	1972	37%	6%	0
Combination (eg. K-1, K-12, 7-12)	18	388	1,545,978	85,888	1971	37%	9%	3
<b>TOTAL</b>	<b>261</b>	<b>4,410</b>	<b>20,696,451</b>	<b>79,297</b>	<b>1972</b>	<b>41%</b>	<b>7%</b>	<b>30</b>

#### B. Building Inventory by Geographic Area

A different way to break down the building inventory summary is by geographic area.

Under the "Average SF per school" column, the highlighted color trend of green to red corresponds to an age trend from younger to older. Thus, from the district averages, the oldest buildings are in the Honolulu District. However, regardless of which district the "beyond expected life" buildings are located, major structural renovations or replacements for those buildings should be planned to begin a new service life.

Under the "Portable SF % of Total" column, the highlighted color trend of green to red corresponds to a portable square footage trend from less to more. Thus, Maui District contains the greatest amount of portable space relative to the amount of total space. Similar to the old buildings and regardless of location, schools with a large percentage of programmatic space in portables should be planned for either their replacement with permanent classrooms or for their removal if necessary.

District	Number of Schools	Number of Bldgs	SF	Ave SF per school	Average Year by SF	% in 'Old' or 'Beyond Expected Life' Age Profile	Portable SF % of Total	SF per student
Honolulu District	54	589	3,996,626	74,012	1960	69%	2%	130
Central District	42	759	3,454,574	82,252	1972	42%	8%	107
Windward District	31	435	2,110,954	68,095	1967	52%	6%	143
Leeward District	44	870	4,420,246	100,460	1981	24%	8%	108
Hawaii District	43	774	3,102,619	72,154	1973	34%	9%	134
Maui District	32	679	2,423,246	75,726	1980	29%	12%	114
Kauai District	15	303	1,175,224	78,348	1977	29%	8%	126
<b>TOTAL</b>	<b>261</b>	<b>4,409</b>	<b>20,683,489</b>	<b>79,247</b>	<b>1973</b>	<b>41%</b>	<b>7%</b>	<b>120</b>

Appendix A shows a chart of each school's age.

Appendix B shows a chart of each building's age profile.

### III. Funding Requirements

Proper repair and maintenance of schools provides safe, healthy and comfortable learning environments for students and staff. It also extends the operational efficiency and expected lifespan of facilities to ensure that the maximum possible return on these capital investments are achieved. To meet this responsibility, a substantial amount of funds must be devoted.

#### A. Renewals

Even with proper routine maintenance, buildings and grounds deteriorate. The average school building age is 44 years old and the average school age is 61 years old. Most buildings systems, components, equipment and finishes do not last this long. The foundation and structure of a building will normally outlast the flooring, paint, windows, doors, lights, plumbing, electrical, and air conditioning systems for example. The periodic renewal of building systems, components, equipment and finishes by repair or replacement will sustain or extend the service life of the entire facility. In some cases, repair or replacement of a part of the foundation or structure of a building is also required.

## 1. Types of Periodic Renewals

The types of periodic renewals are as follows:

- Roof (roofing, gutters, fascia)
- Structure (foundations, floors, pavements, walls, columns, roofs)
- Exterior finishes (walls, windows, doors)
- Interior finishes (flooring, walls, ceilings, doors, stairs, counters, cabinets)
- Electrical (power service and distribution, lighting, fire alarm systems, program bell systems, telecommunication systems)
- HVAC (air conditioning, ventilation, ceiling fans)
- Plumbing (water, sewer, fire protection, septic systems)
- Conveyance (elevators, wheelchair lifts)
- Site (driveways, parking lots, walkways, drainage systems, retaining walls, playcourts, athletic fields)

## 2. Funding to Address Annual Renewals

The American Public Works Association (APWA) use capital renewal and maintenance standards to guide owners and facility managers to keep facilities in good working order. The current replacement value (CRV) is used for industry facilities spending standards to calculate the general annual spending required for renewals.

Current Replacement Value (CRV) of Hawaii DOE K-12 Public Schools:

New Construction Cost x Facilities Quantity = Current Replacement Value  
(Average Cost per SF) x (Total SF) = CRV

\$350 per SF x 20.7 million SF = \$7.2 billion CRV

As compared to Hawaii's average cost per SF, the national average cost per SF for new construction is currently \$256 (Source, State of Our Schools, America's K-12 Facilities, 2016, joint publication of the 21<sup>st</sup> Century Fund, Inc., U.S. Green Building Council, Inc., and the National Council on School Facilities). The APWA recommends that an amount of 2 percent of the CRV is needed annually for the replacement or renewal of facility components and systems (not land). Meeting this standard requires funding of \$145 million annually.

## B. Deferred Maintenance and Renewal Backlog

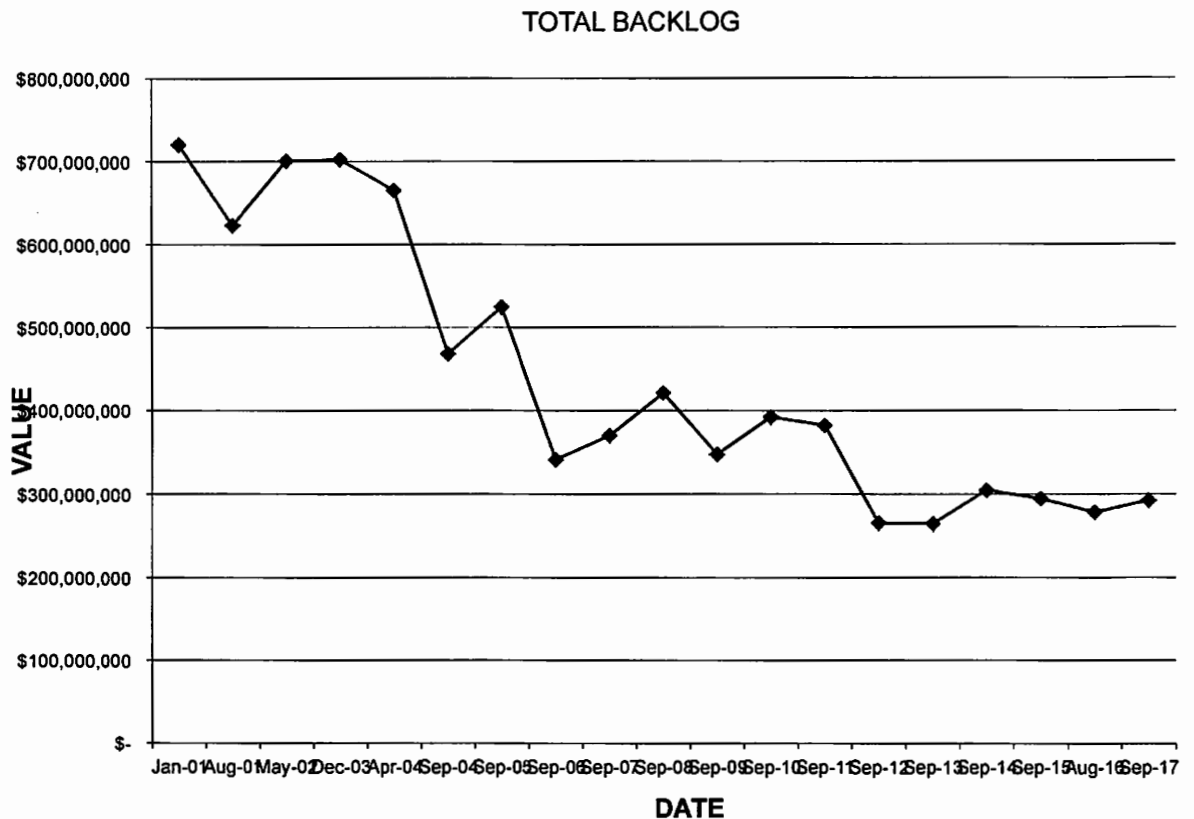

The building system, component, equipment and finishes repairs and replacements that were deferred or postponed until funding is available is referred to as the deferred maintenance and renewal backlog, or "R&M Backlog."

## 1. Status of R&M Backlog

The overall state of condition of schools can be measured by the total backlog amount. A decreased backlog amount means a better state of condition.

In 2017, the Hawaii State Legislature appropriated a lump sum of \$90,000,000, under Act 49, SLH 2017, relating to the State Budget, to fund condition-type projects, including major repair and maintenance projects. These funds will enable the DOE to address projects on the R&M Backlog. However, due to the increasing repairs as the schools age, the backlog increased by 5 percent from approximately \$279 million in September 2016 to approximately \$293 million in September 2017.

The chart below shows the overall downward trend of the backlog since 2001, based on a once-per-year point of reference.

## Geographic Breakdown

Further details of the backlog based on geography are as follows:

(Note: PCCS... Public Conversion Charter School)

DISTRICT	# OF SCHOOLS	TOTAL BACKLOG	AVERAGE BACKLOG PER SCHOOL
HONOLULU	54 (incl. 1 PCCS)	\$44,114,000	\$816,000
HAWAII	43 (incl. 2 PCCS)	\$56,113,000	\$1,304,000
WINDWARD	31 (incl. 1 PCCS)	\$26,147,000	\$843,000
LEEWARD	44 (incl. 1 PCCS)	\$44,164,000	\$1,003,000
CENTRAL	42	\$44,111,000	\$1,050,000
MAUI	32 (incl. 1 PCCS)	\$58,734,000	\$1,835,000
<u>KAUAI</u>	<u>15</u>	<u>\$19,597,000</u>	<u>\$1,306,000</u>
TOTAL	261 (incl 6 PCCS)	\$293,000,000	\$1,122,000

Appendix C shows the R&M backlog for each school.

Appendix D shows a list of R&M projects initiated in Fiscal Year 2017.

Appendix E shows a list of R&M projects completed in Fiscal Year 2017.

### 2. Funding to Address the R&M Backlog

A systematic approach is needed to reduce the accumulated amount of deferred maintenance and renewals. To address the current R&M backlog amount of approximately \$293 million in six years, divided equally per year, will require funding of \$49 million per year.

### C. Total Funding Required for Combined Anticipated Annual Renewals and R&M Backlog

The total funding required to address the anticipated annual renewals and the current R&M backlog together is as follows:

R&M Backlog: \$293 million/6 years or approximate \$49 million for six years

+ Renewals: \$145 million for each year

=Total: \$194 million needed annually for six years

## IV. Program Management

The program management to address the R&M Backlog and anticipated renewals is planned, prioritized and budgeted categorically. The categories of projects are as follows:

- Typical repair and maintenance projects – to address renewals of building systems, components, equipment and finishes.

- Structural improvements – to address structural deficiencies that may impact the service life of an existing building or other school facility.
- Health and safety type improvements – to address code or regulation deficiencies that may affect the use and/or occupancy of the existing building.
- School-wide refurbishment (i.e., Whole School Renovations) – to sustain the interior and exterior finishes and building envelope for an entire school.
- Electrical/Infrastructure improvements – to sustain the electrical and telecommunication infrastructure for an existing school on a campus-wide basis based on current program requirements.
- Hazardous material removal – to remediate hazardous material that may pose an immediate risk.

The overall intent is to sustain or extend the service life of the existing buildings and infrastructure of the schools. Forecasting the rebuilding or replacement of a building or facility is essential to the decision making to stop investing funds into further renewals. The DOE is developing a forecasting model that factors in the remaining service life of a building, comparison to the DOE's programmatic standards, and enrollment/capacity projections

## **V. Summary**

There has been significant progress since 2001 toward addressing the backlog of renewals that have accumulated. The financial support of the Hawaii State Legislature has been integral to the DOE's efforts. Continued support is needed to sustain and extend the service of life of school buildings. The deferred backlog of renewals needs to be reduced before the conditions worsen or before other renewals are added to it. It is estimated that \$194 million is needed annually for the next six years to eliminate the current backlog and address the renewals that are expected arise annually.

While proper repair and maintenance is needed to sustain the use of the existing buildings and infrastructure, there is a point that it makes more sense to recapitalize or rebuild a building, set of buildings or an entire school. Greater efforts by the DOE will focus on identifying the programmatic gaps within outdated buildings. Closely managing these assets will keep school buildings and campuses safe, healthy, positive and updated learning environments for today's 180,000 students, in every community, and for generations to come.

**APPENDIX A - AGES OF SCHOOLS**

- Notes: 1. School age is based on the age of the oldest existing building  
 2. PCCS means public conversion charter school  
 3. Highlighted and bold schools moved to the next oldest age bracket in 2017
